Sustainable Energy Communities

## Location of the exhibition of the Smart house corner

In case of the Smart Energy Efficiency Houses/Corners, the exhibition in Slovenia is located in the regional urban centre and in a highly public so-called “Smart House” building in Martjanci 36, 9221 Martjanci – Slovenia.

Intelligent Energy  Europe

## The Smart Energy Efficiency corner

In the “Smart House” we have prepared an exhibition of new EE household appliances together with old high consumption household appliances. We prepared instructions on how to improve energy efficiency by using EE household appliances and general advices about economical use of them.

# The Smart Energy Efficiency building

The building stands for a demonstration and dissemination centre for renewable energy sources and rational use of energy in Pomurje region, national wide, and also in the cross-border area. In the building, educational and advisory activities are provided for encouragement and promotion of sustainable energy development. The Bistra hiša as lead partner for setting up the exhibition in Slovenia, is focusing on demonstration of energy efficient regulation of heating, cooling, ventilation and also energy efficient isolation of low-energy houses. We also promote use of solar energy for production of electricity.

**Promotion of the project NIMSEC**

With intention to promote efficiently use of energy through use of EE household appliances we organised a open workshop for visitor of the store with new kitchen furniture and equipment.
